

KENT JOHN GOCOTANO

Full-Stack Developer · Laravel · Vue · MySQL / PostgreSQL

Digos City, Davao del Sur, PH · gocotano.kentjohn@gmail.com · linkedin.com/in/kentjohnngo · github.com/mrcoffeeex

PROFESSIONAL SUMMARY

Full-stack developer with 5+ years shipping production web systems for government, education, healthcare, and multi-branch businesses. Specialize in Laravel + Vue + Tailwind + SQL, owning features from requirements to deployment. Strong track record converting paper/manual workflows into systems teams use daily.

TECHNICAL SKILLS

Backend: Laravel, PHP, REST APIs, auth/Sanctum, queues, Pest

Frontend: Vue, Tailwind CSS, JavaScript, HTML/CSS, responsive UI

Data: MySQL, PostgreSQL, SQLite, query design, indexing

Tools: Linux, Git/GitHub, CI/CD, Redis, S3, Laravel Cloud, Cursor / Copilot

WORK EXPERIENCE

Full-Stack Developer | Provincial Budget Office (PBO), Provincial Government of Davao del Sur

Digos City · Current · dts.pbodavaodelsur.com

- PBO DTS: Built and maintain the Document Tracking System so offices can digitally intake, route, and audit budget documents with role-based access—replacing slow paper chasing with a live trail (dts.pbodavaodelsur.com).
- Infra Monitoring System: Delivered an infrastructure project monitoring app for administrators, consolidating project status into one operational view instead of scattered spreadsheet updates (infra.pbodavaodelsur.com)..
- Flow: Designed Flow, an internal multi-step workflow system for PBO processes—role-aware stages and status controls that clarify handoffs and “what’s next” across recurring office chains (served locally).
- Own ongoing full-stack delivery for PBO systems: ship features, resolve production issues, and support user access/enrollment so mission-critical tools stay reliable for daily government work.

Part-Time Web Development Instructor | University of Mindanao Digos College

Digos City · Part-time

- Teach web development from foundations (HTML/CSS/JS) through Git, MySQL, Tailwind, React, and Laravel—using lesson plans, decks, labs, and project work so students reach capstone-ready full-stack skills.
- UMRIC: Created UMRIC, a web system for UM Digos research and innovation workflows, giving the campus a purpose-built platform instead of ad-hoc files and forms (www.umdcric.com).

IT Specialist | Saint Rita Security Training & Technological Institute Inc.

On-site

- Handled system administration, computer maintenance, and graphics support—keeping labs and staff machines usable with faster turnaround on day-to-day IT requests.

Web Developer | SiBS (Siblings Solutions)

On-site

- Initiated Cronos, an employee time-tracking and performance monitoring system (PHP, JavaScript, HTML, CSS), giving HR/ops a digital baseline for attendance and performance.

SELECTED PERSONAL PRODUCT

- CourtRivals (courtrivals.app): Founded and engineered a live full-stack sports venue management platform.

EDUCATION

B.S. Information Technology — University of Mindanao Digos College · Silver Research Award

CERTIFICATIONS

- DICT XI — Advanced Laravel (40 hours)

- IBM — Web Development Fundamentals
- Cisco Academy — HTML, CSS, JavaScript Essentials 1 & 2
